

SDG 16.2.4

16.2.4 - Ensure that local stakeholders in the university – including local residents, local government, and civil society representatives (which may include groups such as refugee resettlement agencies) – have a meaningful mechanism or for participating in university decision making.

Item 1. University units incharge of engagement with local residents, local governments, and civil society representatives

YunTech has established a stakeholder management team to identify local communities and stakeholders and bring them into participation. The tasks of the dedicated team include identifying and communicating with stakeholders, regularly reviewing the effectiveness of the university's interaction with stakeholders, and promoting stakeholder management knowledge.

- The secretarial office is responsible for engagement with local residents, local governments, and representatives of local civil society representatives.

1. Engagement with Local resident and county government

<https://www.cw.com.tw/article/5124875>

https://www.yunlin.gov.tw/News_Content.aspx?n=1244&sms=9662&s=364181

Stakeholder Needs: Yunlin County has a senior population of over 120,000 people, with a very high proportion of elderly individuals. There is a high demand for healthcare services for the elderly population.

In response to the "super-aging society," the county government provides funding for YunTech to establish the "Silver Fitness Club" - the Smart Active Aging Health Promotion Center. This center is

designed by faculty and students from the Leisure and Recreation Sport Department to offer fitness programs tailored for seniors, promoting physical activity among the elderly in the community. The Silver Fitness Club aims to enhance the health of the elderly through exercise training.

YunTech Smart Elderly Health Promotion Center leads the elderly from local city to carry out various sports to promote health

2. Engagement with Local community

Stakeholder Needs: Yunlin County has only one reservoir water source, making water resource conservation extremely important.

Recognizing the vital importance of conserving the county's sole reservoir water source, YunTech continued its collaboration with the Hushan Reservoir Environmental Education Park (a local water source area) in 2022. Through lesson plans and educational materials, the university aimed to raise awareness among Yunlin County residents about the conservation of water resources and ecological preservation.

YunTech with Hushan Reservoir Education Park conducted water resource education for the staff of the Yunlin County District Prosecutors Office.

3. Engagement with local governments, medical institutions, and citizen groups

Stakeholder Needs: Yunlin County, being an agricultural county, is in urgent need of creating a sustainable agricultural environment, and the Yunlin County government is actively promoting sustainable development.

In response to this need, YunTech collaborates with the local government, experts and scholars, medical institutions, and civil society organizations to actively participate in local SDGs (Sustainable Development Goals) sustainable development planning and share experiences in SDGs implementation. Furthermore, YunTech has also signed an SDGs cooperation memorandum of understanding.

The image displays the cover of the 'Yunlin County Voluntary Local Review Report' (雲林縣自願檢視報告) on the left, which includes the title, logo, and contact information. On the right is a strategic framework diagram titled 'Yunlin for SDGs' and 'I + 2030 雲林新政願景'. The diagram is structured as follows:

- 永續發展願景** (Sustainable Development Vision): 幸福雲林 永續上場 (Happy Yunlin, Sustainable Success)
- 核心價值** (Core Values): 健康友善 (Healthy and Friendly), 共容共榮 (Inclusive and Prosperous), 智慧創生 (Smart and Innovative), 低碳永續 (Low Carbon and Sustainable), 整合創新 (Integrated and Innovative), 服務效率 (Service Efficiency)
- 施政方針** (Policy Direction):
 - 注重基礎照護，持續完善社會福利 (Emphasize basic care, continue to improve social welfare)
 - 提升差異認同，尊重多元文化性別 (Improve differential recognition, respect diverse cultures and genders)
 - 強化優質教育，提供多元均等學習 (Strengthen quality education, provide diverse and equal learning)
 - 打造幸福城鄉，友善高齡弱勢團體 (Build happy cities and towns, be friendly to elderly and vulnerable groups)
 - 健康管理轉型，發展兩條長照產業 (Transition to health management, develop two long-term care industries)
 - 農工雙軸並重，完善軟體硬體基礎 (Balance agriculture and industry, improve software and hardware foundations)
 - 創生多元產業，深化文化觀光轉型 (Create diverse industries, deepen cultural tourism transformation)
 - 推動永續農業，循環經濟智慧創新 (Promote sustainable agriculture, circular economy and smart innovation)
 - 建構綠色蓋盤，維護水陸生態環境 (Build green cover, maintain water and land ecological environment)
 - 促進資源永續，強化防災復原韌性 (Promote resource sustainability, strengthen disaster prevention and resilience)
 - 持續改善機制，維護和平多元正義 (Continue to improve mechanisms, maintain peace and justice)
 - 施政創新便民，鼓勵社群協作參與 (Innovative and convenient governance, encourage community cooperation and participation)
- 核心目標** (Core Objectives): A grid of 17 SDG icons with progress indicators.
- 相關目標** (Related Objectives): A grid of 17 SDG icons with progress indicators.

Item 2. University units incharge of engagement with local private sectors

- **Engagement with private sectors: Industry-Academia Collaboration and Intellectual Property Incubation and Operation Center**

Link: <https://edm.bnnext.com.tw/2021creative/a06.html>

Stakeholder Needs: The industrial and commercial development in Yunlin County is relatively lagging and requires professional assistance.

The "Industry-Academia Collaboration and Intellectual Property Incubation and Operation Center" at YunTech is responsible for connecting government resources, commercial and industrial groups, as well as expert advisory teams, to provide local businesses with services such as "entrepreneurial mentoring, intellectual property patenting, innovative incubation recommendations, overseas business opportunities, and marketing exposure," offering "customized services and supportive counseling." The center maintains a positive interaction with local government agencies, collaboratively organizing seminars, industry-government-academia exchange events, and working with government units to provide local residents with guidance on entrepreneurial knowledge and skills.

1. Guiding local residents in innovative entrepreneurship
