

Wastewater Treatment Plant Management.

YunTech has long adhered to government regulations and is dedicated to maximizing water reuse. The Center of Science and Technology for Environmental and Safety Affairs manages the water purification plant operations as follows:

- Processing is carried out in accordance with the Water Pollution Control Act and related regulations stipulated by the Environmental Protection Administration of the Executive Yuan.
- Operations are conducted in compliance with "Water Pollution Control Measures" approved by the local Environmental Protection Bureau.
- Accurate records of the inflow, outflow, reclaimed water volume, electricity consumption, and other related on-site activities are maintained.
- Every quarter, a testing company recognized by the Environmental Protection Administration of the Executive Yuan is commissioned to analyze the quality of raw sewage, effluent, and reclaimed water.
- Biannual reports are submitted to the Environmental Protection Administration of the Executive Yuan's Water Pollution Control Information Management System by the end of January and July.

Evidence

YunTech rigorously observes the following regulations:

The principles of Incentives for Normal Water Saving Actions in Institutions and Schools, the Ministry of Economic Affairs
