校園中水道二元供水系統

In our campus, the treatment of sewage is treated as an extended aeration process. The recycle-water used as landscape water, fire water-supply, artificial lake, and toilet flush in our dormitory.

Wastewater Treatment Plant

YunTech is the first campus in Taiwan to implement a recycled water reuse system. For 11 consecutive years (2008-2018), it has been recognized by the Energy Bureau, Water Resources Agency, and Ministry of Education as an outstanding school for energy-saving performance.
